

### category

- actin binding
- actin filament binding
- carboxylic acid binding
- cell-cell adhesion mediator activity
- chemorepellent activity
- heparan sulfate sulfotransferase activity
- semaphorin receptor binding
- sodium channel regulator activity

#### size

- 30

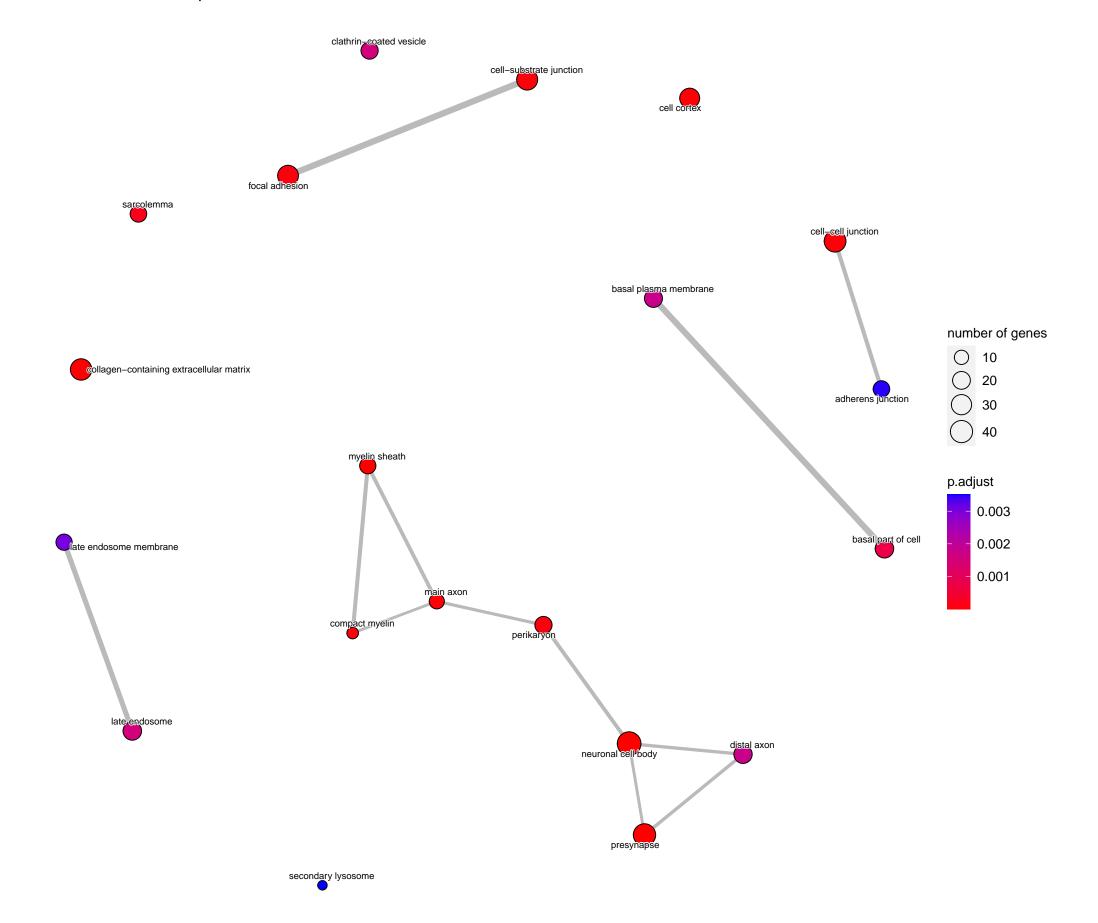

### category

- axon development
- axon ensheathment
- axon ensheathment in central nervous system
- axonogenesis
- central nervous system myelination
- ensheathment of neurons
- glial cell development
- glial cell differentiation
- gliogenesis
- myelination
- negative regulation of cell projection organization
- negative regulation of neuron projection development
- oligodendrocyte development
- oligodendrocyte differentiation
- regulation of anatomical structure size
- regulation of cell development
- regulation of cellular component size
- regulation of nervous system development
- regulation of neurogenesis
- regulation of neuron projection development
